

Daily Plan

05/03

Dmitri Kazantsev

Tasks: {len(issues)}

Your Tasks

45 - Unity vs TouchDesigner vs Hybrid: Real-Time Microphone Audio Visualization – Evaluation & Final Technology Choice

Milestone: 1st milestone: Documentation **Labels:** type: research, type: testing

We need to decide once and for all what we will use for the real-time microphone input + visualization pipeline in Project02: - Unity only - TouchDesigner only - Hybrid (Unity + TouchDesigner connect)

20 - Unity: Microphone input test completed

Milestone: 1st milestone: Documentation **Labels:** type: research, type: testing

Performance & Evaluation Data Time to setup: 5–10 minutes (including adding components and linking references). Time to response (microphone reaction delay): 1 frame (almost real-time, visually in

Comments:

- berlogabob: at electricianv001 please add some data as comment for this issue. something we can measure to use

6 - TD Test: “Can TD call a free speech-to-text system and return text back into TD as DAT/CHOP?”

Comments:

- naydino: - successfully installed a free text to speech transcription model through my computer’s terminal
- naydino: - This test shows that we can load in a free speech to text model on a computer’s hardware and then

4 - Define characteristics of AI Oracle
