Tasks: {len(issues)}

Your Tasks

45 - Unity vs TouchDesigner vs Hybrid: Real-Time Microphone Audio Visualization – Evaluation & Final Technology Choice

Milestone: 1st milestone: Documentation **Labels:** type: research, type: testing

We need to decide once and for all what we will use for the real-time microphone input + visualization pipeline in Project02: - Unity only - TouchDesigner only - Hybrid (Unity + TouchDesigner connect

7 - TD Test: “Can TD push that text out (on-screen now; Unity later if needed)?”

6 - TD Test: “Can TD call a free speech-to-text system and return text back into TD as DAT/CHOP?”

Comments:

- naydino: - successfully installed a free text to speech transcription model through my computer’s terminal
- naydino: - This test shows that we can load in a free speech to text model on a computer’s hardware and then

5 - TD Test: “Can TD reliably ingest mic audio and turn it into usable control/data?”

Milestone: 1st milestone: Documentation **Labels:** type: research, type: testing

Test to answer the question “How can we take a microphone input and transform it”

Comments:

- berlogabob: at naydino please add some data as comment for this issue. something we can measure to use for comp

3 - Define characteristics of AI Oracle

1 - How does the plotter connect to the PC?

Milestone: 1st milestone: Documentation
